

HYPERBARIC PRESSURE TESTING

Ref: (a) MILPERSMAN 1220-180

1. **Purpose:** The hyperbaric pressure test is designed to Determine if the applicant can successfully adapt to increase atmospheric pressure without an adverse physiological reaction.

2. **Conducting the test:** This test is conducted in a hyperbaric recompression chamber

3. **Waivers**

Waivers for initial applicant screening maybe granted if a hyperbaric chamber facility is not accessible due to geographic isolation. This waiver is granted to the candidate by the screening activity
